PROFILE

Master's student in Computer Science currently completing a graduate internship at **Airbus Defence and Space** in Germany, graduating in August 2026. Hands-on experience with Linux systems, CI/CD automation, Infrastructure-as-Code, and cloud-native environments. Skilled in developing automation scripts with Python and Bash, deploying containerized applications with Docker and Kubernetes, and building deployment pipelines using Jenkins, Terraform, and GitHub Actions. Passionate about DevOps culture, continuous improvement, and automation.

WORK EXPERIENCE

DevOps & Cloud Engineer Intern : Airbus Defence and Space, Germany

Apr 2026 – Present

- Supported CI/CD infrastructure by troubleshooting deployment failures across Linux and Windows environments, analyzing pipeline logs, and resolving integration issues.
- Worked with Jenkins pipelines, automated test environments, and infrastructure components to investigate build, deployment, and configuration failures.
- Developed automation scripts using Python and Bash to simplify repetitive operational tasks, improve deployment workflows, and reduce manual intervention.
- Collaborated with software, integration, and infrastructure engineers to document deployment procedures, support system validation, and improve operational processes.

Cloud/DevOps Intern : United Services, Tunis

Jul 2025 – Sep 2025

- Developed and deployed a full-stack application using Spring Boot and Angular, integrating secure REST APIs and backend services.
- Designed and maintained Jenkins CI/CD pipelines to automate build, testing, and deployment processes.
- Administered Linux environments, implemented monitoring solutions, and automated operational tasks using Bash scripting to improve system reliability.
- Collaborated in an Agile development team while applying secure development practices throughout the software lifecycle.

Engineering Intern : Inetum, Tunis

Jul 2024 – Sep 2024

- Customized and extended enterprise web platforms using WSO2 technologies, Java, and web development tools to meet client requirements.
- Developed a custom Java mediator for WSO2 to generate authentication tokens with configurable expiration policies and deployed the solution using Docker.
- Participated in API integration, backend customization, and technical troubleshooting while collaborating with senior engineers in an enterprise environment.

PROJECT EXPERIENCE

Cloud & Hybrid Infrastructure Deployment : ESPRIT

Oct 2024 – May 2025

- Designed and deployed a Kubernetes-based hybrid infrastructure hosting containerized microservices, AI components, and full-stack applications.
- Automated infrastructure provisioning and application deployment using Ansible, significantly reducing manual configuration effort.
- Implemented CI/CD workflows together with Docker and Kubernetes to streamline application delivery and deployment consistency.
- Integrated Prometheus and Grafana for infrastructure monitoring and centralized operational visibility.
- Configured secure containerized environments using Kubernetes Secrets, role-based access control (RBAC), and network policies while documenting the overall platform architecture.

High-Availability Reservation System : ESPRIT

Jan 2024 – May 2024

- Developed a full-stack reservation platform using Java/JavaFX, Symfony, PHP, and MySQL following a layered software architecture.
- Designed and implemented REST APIs, business logic, and relational database models supporting reservation, user, and payment management.
- Implemented authentication, real-time data synchronization, and administrative features to improve usability and maintainability.
- Collaborated within an Agile team using Git-based workflows, emphasizing clean code, software quality, and maintainable architecture.

TECHNICAL SKILLS

Cloud Platforms: AWS, Azure, Hybrid & On-Premises Integration
Virtualization & Containers: Docker, Kubernetes, OpenStack, Ansible
Middleware & Integration: REST APIs, System Integration, Data Pipelines, API Design
CI/CD & Automation: Jenkins, GitHub Actions, Azure DevOps, Azure Pipelines, Terraform, Infrastructure-as-Code
Frameworks & Libraries: Spring Boot, Angular, Symfony, React, Flutter, Node.js
Programming & Scripting: Java, Python, JavaScript, TypeScript, PHP, C, C#, Bash, PowerShell
Networking & Security: CCNA, IAM Concepts, Secure CI/CD, Cloud Security Best Practices
Databases: MySQL, Relational Database Design

EDUCATION

Technische Universität Ilmenau, Germany Oct 2025 – Sep 2026
Exchange Semester : Cloud Systems & Software Engineering
ESPRIT (Private School of Engineering) Tunis, Tunisia Sep 2023 – August 2026
Master Diploma : Engineering in Computer Science (Expected graduation: August 2026, final semester includes a mandatory 6-month internship)
FSEGS (Faculty of Economics & Management) Sfax, Tunisia Sep 2020 – Jun 2023
Bachelor Diploma : Computer Science Applied to Management
High School Mohamed Ali Sfax, Tunisia Sep 2016 – Jun 2020
High School Diploma : Baccalaureate in Mathematics

CERTIFICATIONS

- AWS Academy Cloud Security Foundations
- AWS Academy Cloud Operations
- Kubernetes Fundamentals
- CCNA: Switching, Routing, and Wireless

LANGUAGES

- Arabic (Native)
- English (Fluent, C1)
- French (Fluent, B2)
- German (A2, actively progressing)
