WORK EXPERIENCE

Engineering internship — Inetum, Tunis

From July 2024 to September 2024

- Customized the WSO2 Developer Portal/API Marketplace to align with client branding.
- **Technologies** : REST API, Node js, React, Postman

Web development Internship — Unilog, Sfax

From February 2023 to June 2023

- Developed a website called "MeetWise" to manage and arrange meetings for a company . I can create a meeting with multiple date and time slots with different topics .
- Each invitee receives their invitation and chooses the slots they want to vote for.
- **Technologies** : Angular, Node Js, JavaScript, MySQL database

ACADEMIC PROJECTS

TurathAI – Cultural Tourism Platform

- Developed a platform to promote Tunisia's heritage sites and cultural experiences featuring interactive maps and personalized recommendations
- Deployed on private cloud infrastructure using Docker, Ansible And Kubernetes.
- Key technologies: Java, Angular, MySQL, Docker, Kubernetes

MatchMate

- Engineered a JavaFX/Symfony-based sports facility booking system with relational database integration, improving reservation efficiency.
- Created a web version using Symfony framework, making MatchMate accessible across different devices for a seamless experience.
