## Cloud & DevOps Engineer

CI/CD • Automation • Developer Tooling • Docker • Kubernetes • Linux • Git

### PROFILE

Master's student in Computer Science specializing in **cloud platforms, distributed systems, and data-driven architectures** with hands-on experience in CI/CD automation, Kubernetes cluster management, and containerized application deployment. Skilled in **Docker, GitHub Actions, Linux environments, and infrastructure automation**. Strong interest in building scalable and highly available systems, with a structured and problem-solving mindset. Motivated to contribute to production-grade DevOps environments and continuously improve deployment reliability.

### WORK EXPERIENCE

#### Cloud/DevOps Intern : United Services, Tunis (On-site)

Jul 2025 – Sep 2025

- Built and maintained **Jenkins CI/CD pipelines**, monitored job executions, analyzed failures, and improved deployment reliability through automation and log inspection.
- Developed **Python and Bash automation scripts** to reduce manual operational work and support repeatable deployments.
- Administered and troubleshooted **Debian/Ubuntu Linux systems**, including package management, service configuration, log analysis, and system monitoring.
- Contributed to a full-stack internal application (**Spring Boot, Angular**), focusing on backend stability and deployment readiness.
- Collaborated in an agile team environment with structured workflows, version control, and documentation.

#### Engineering Intern : Inetum, Tunis

Jul 2024 – Sep 2024

- Developed backend systems applying **object-oriented programming** principles and algorithms to deliver practical software solutions.
- Gained experience in **software engineering** best practices and testing.

### PROJECT EXPERIENCE

#### Cloud Solution Architecture & Deployment Project : ESPRIT

Oct 2024 – May 2025

- Designed and deployed a **cloud-native infrastructure** following DevOps and security-aware best practices to host and scale a full-stack application, gaining hands-on experience in cloud-native system architecture.
- Deployed a full-stack application (Spring Boot, Angular) on **Kubernetes**, managing 8+ manifests and services.
- **Implemented Infrastructure-as-Code with Ansible** to automate the setup and configuration of a 4-node Kubernetes cluster, ensuring reproducible and scalable deployments.
- **Developed and integrated an AI-powered chatbot using Python** as an additional feature, showcasing the ability to enhance applications with intelligent services.
- Integrated monitoring, logging, and basic data flow validation concepts to support observability, reliability, and scalable service communication within distributed environments.

#### High-Availability Reservation System : ESPRIT

Jan 2024 – May 2024

- Engineered a full-stack application using **Java/JavaFX** and **Symfony/PHP** with a unified **MySQL** backend.
- Optimized system performance, achieving a **40% reduction in booking processing time** through architectural improvements and real-time updates.
- Designed a robust database schema supporting **500+ daily transactions** with high data consistency.
- Developed and executed the project using **Agile methodologies** and comprehensive integration strategies.

TECHNICAL SKILLS

**Containerization & Orchestration:** Docker, Kubernetes, Ansible, Linux, Nginx, OpenStack, AWS  
**Cloud & DevOps:** AWS, CI/CD Pipelines, Jenkins, GitHub Actions, Git, Azure DevOps, Automation  
**Programming Languages:** Python, Java, JavaScript, TypeScript, PHP, C, C#, Bash  
**Scripting & Automation:** PowerShell , Bash, Python, Infrastructure Automation  
**DevOps Tools:** Visual Studio Code, Azure Repos, Azure Pipelines, Terraform  
**Frameworks & Libraries:** Spring Boot, Angular, Symfony, React, Flutter, Node.js  
**Databases & APIs:** MySQL, REST APIs, Data Pipelines, System Integration  
**Automation & AI:** API Integration, Workflow Automation, System Integration, AI Tools, Process Optimization

EDUCATION

**Technische Universität Ilmenau, Germany** Oct 2025 – Sep 2026  
*Exchange Semester : Cloud Systems & Software Engineering*  
**ESPRIT( Private School of Engineering) Tunis, Tunisia** Sep 2023 – August 2026  
*Master Diploma : Engineering in Computer Science (Expected graduation: August 2026, final semester includes a mandatory 6-month internship)*  
**FSEGS ( Faculty of Economics & Management ) Sfax, Tunisia** Sep 2020 – Jun 2023  
*Bachelor Diploma : Computer Science Applied to Management*  
**High School Mohamed Ali Sfax, Tunisia** Sep 2016 – Jun 2020  
*High School Diploma : Baccalaureate in Mathematics*
